

**IN THE SPECIFICATION**

Please amend Paragraph 26 of the Specification as follows. No new matter has been added with this Amendment.

A machine-readable medium includes any mechanism for storing or transmitting information in a form readable by a machine (e.g., a computer). For example, a machine-readable medium includes a machine readable storage medium (e.g., read only memory ("ROM"); random access memory ("RAM"); magnetic disk storage media; optical storage media; flash memory devices; etc.), ~~a machine-readable transmission medium (e.g., electrical, optical, acoustical or other form of propagated signals (e.g., carrier waves, infrared signals, digital signals, etc.); etc.), etc.~~

Please amend Paragraph 91 of the Specification as follows. No new matter has been added with this Amendment.

The disk drive unit 1316 includes a computer-readable medium 1324 on which is stored a set of instructions (i.e., software) 1326 embodying any one, or all, of the methodologies described above. The software 1326 is also shown to reside, completely or at least partially, within the main memory 1304 and/or within the processor 1302. The software 1326 may further be transmitted or received via the network interface device 1322. For the purposes of this specification, the term "computer-readable medium" shall be taken to include any medium that is capable of storing or encoding a sequence of instructions for execution by the computer and that cause the computer to perform any one of the methodologies of the present invention. The term "computer-readable medium" shall accordingly be taken to include[[d]], but not be limited to, solid-state memories, optical and magnetic disks,~~and carrier wave signals.~~
